

AVIRAL™

A REVOLUTIONARY ANTI-ADHESION TECHNOLOGY
FOR THE COATING INDUSTRY

- Single component, ready to use, no harsh chemicals.
- Transparent and can be applied to painted or non painted surface.
- Adheres strongly to substrates for longer lasting protection.
- Oleophobic, prevents adhesion of water, oil and dirt.
- Develops smooth soft touch surface.
- Self cleaning through rolling of water droplets.
- Resists ice adhesion and fungus development on the surface.
- Passes more than 500 hours of salt spray test to impart corrosion protection to metals.
- Absorbs UV light, abrasion resistance, high thermal stability and flame retardant.
- Passes most of the aerospace grade coating test requirement.
- Maximum ice adhesion and dislodging load less than 1 psi.

**HIGH PERFORMANCE DUST
AND ICE RESISTANCE
COATING**
